Ingestion:	Wash out mouth with water. Do not induce vomiting. Give 1 cup of water to drink every 10	
	minutes. If unconscious, check for breathing and apply artificial respiration if necessary.	
	If unconscious and breathing is OK, place in the recovery position. Transfer to hospital	
	as soon as possible.	
Inhalation:	Remove casualty from exposure ensuring one's own safety whilst doing so. If	
	unconscious and breathing is OK, place in the recovery position. If conscious, ensure	
	the casualty sits or lies down. If breathing becomes bubbly, have the casualty sit and	
	provide oxygen if available. Transfer to hospital as soon as possible.
