

5-METHYL-2-(TRIFLUOROMETHYL)BENZYLAMINE

Page: 1

Compilation date: 18/03/2016

Revision No: 1

Section 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name: 5-METHYL-2-(TRIFLUOROMETHYL)BENZYLAMINE

CAS number: 1017779-30-4

Product code: PC302363

1.2. Relevant identified uses of the substance or mixture and uses advised against

1.3. Details of the supplier of the safety data sheet

Company name:Apollo Scientific LtdUnits 3 & 4ParkwayDentonManchesterM34 3SGUKTel:0161 337 9971Fax:0161 336 6932Email:david.tideswell@apolloscientific.co.uk

1.4. Emergency telephone number

Section 2: Hazards identification

2.1. Classification of the substance or mixture

Classification under CLP: Skin Corr. 1B: H314

Most important adverse effects: Causes severe skin burns and eye damage.

2.2. Label elements

Label elements:

Hazard statements: H314: Causes severe skin burns and eye damage.

Signal words: Danger

Hazard pictograms: GHS05: Corrosion

Precautionary statements: P310: Immediately call a POISON CENTER/doctor/.

P260: Do not breathe vapours.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

5-METHYL-2-(TRIFLUOROMETHYL)BENZYLAMINE

2.3. Other hazards

PBT: This product is not identified as a PBT/vPvB substance.

Section 3: Composition/information on ingredients

3.1. Substances

Chemical identity: 5-METHYL-2-(TRIFLUOROMETHYL)BENZYLAMINE

CAS number: 1017779-30-4

Section 4: First aid measures

4.1. Description of first aid measures

Skin contact:	Remove all contaminated clothes and footwear immediately unless stuck to skin.
	Drench the affected skin with running water for 10 minutes or longer if substance is still
	on skin. Transfer to hospital if there are burns or symptoms of poisoning.

- **Eye contact:** Bathe the eye with running water for 15 minutes. Transfer to hospital for specialist examination.
 - Ingestion: Wash out mouth with water. Do not induce vomiting. Give 1 cup of water to drink every 10 minutes. If unconscious, check for breathing and apply artificial respiration if necessary. If unconscious and breathing is OK, place in the recovery position. Transfer to hospital as soon as possible.
 - **Inhalation:** Remove casualty from exposure ensuring one's own safety whilst doing so. If unconscious and breathing is OK, place in the recovery position. If conscious, ensure the casualty sits or lies down. If breathing becomes bubbly, have the casualty sit and provide oxygen if available. Transfer to hospital as soon as possible.

4.2. Most important symptoms and effects, both acute and delayed

Skin contact: Blistering may occur. Progressive ulceration will occur if treatment is not immediate.

Eye contact: Corneal burns may occur. May cause permanent damage.

- **Ingestion:** Corrosive burns may appear around the lips. Blood may be vomited. There may be bleeding from the mouth or nose.
- **Inhalation:** There may be shortness of breath with a burning sensation in the throat. Exposure may cause coughing or wheezing.

4.3. Indication of any immediate medical attention and special treatment needed

Section 5: Fire-fighting measures

5.1. Extinguishing media

Extinguishing media: Carbon dioxide, dry chemical powder, foam. Suitable extinguishing media for the

surrounding fire should be used. Use water spray to cool containers.

5.2. Special hazards arising from the substance or mixture

Exposure hazards: Corrosive. In combustion emits toxic fumes of carbon dioxide / carbon monoxide.

Nitrogen oxides (NOx). Hydrogen fluoride (HF).

5-METHYL-2-(TRIFLUOROMETHYL)BENZYLAMINE

	raye. 3
5.3. Advice for fire-fighters	
Advice for fire-fighters:	Wear self-contained breathing apparatus. Wear protective clothing to prevent contact
-	with skin and eyes.
Section 6: Accidental release r	·
Section 0. Accidental release i	lieasules
6.1. Personal precautions, prot	ective equipment and emergency procedures
Personal precautions:	Notify the police and fire brigade immediately. If outside keep bystanders upwind and
	away from danger point. Mark out the contaminated area with signs and prevent access
	to unauthorised personnel. Do not attempt to take action without suitable protective
	clothing - see section 8 of SDS. Turn leaking containers leak-side up to prevent the
	escape of liquid.
6.2. Environmental precautions	3
	Do not discharge into drains or rivers. Contain the spillage using bunding.
6.3. Methods and material for c	containment and cleaning up
Clean-up procedures:	Clean-up should be dealt with only by qualified personnel familiar with the specific
	substance. Absorb into dry earth or sand. Transfer to a closable, labelled salvage
	container for disposal by an appropriate method.
6.4. Reference to other section	S
Osstian 7. Handling and stars	
Section 7: Handling and storage	je
7.1. Precautions for safe handl	ing
Handling requirements:	Avoid direct contact with the substance. Ensure there is sufficient ventilation of the area.
5	Do not handle in a confined space. Avoid the formation or spread of mists in the air. Only
	use in fume hood.
7.2 Conditions for safe storage	e, including any incompatibilities
Storage conditions:	Store in a cool, well ventilated area. Keep container tightly closed. Air sensitive. Store
• • • • • •	under Argon.
	Must only be kept in original packaging.
7.3. Specific end use(s)	
Specific end use(s):	No data available.
Section 8: Exposure controls/	personal protection
8.1. Control parameters	
· · · · ·	
Workplace exposure limits:	No data available.
DNEL/PNEC Values	

DNEL / PNEC No data available.

5-METHYL-2-(TRIFLUOROMETHYL)BENZYLAMINE

Page: 4

8.2. Exposure controls

Engineering measures: Ensure there is sufficient ventilation of the area.

Respiratory protection: Self-contained breathing apparatus must be available in case of emergency.

Hand protection: Impermeable gloves.

Eye protection: Tightly fitting safety goggles. Ensure eye bath is to hand.

Skin protection: Impermeable protective clothing.

Section 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

State: Liquid

Odour: amine-like

Solubility in water: Not miscible or difficult to mix

9.2. Other information

Other information: No data available.

Section 10: Stability and reactivity

10.1. Reactivity

Reactivity: Stable under recommended transport or storage conditions.

10.2. Chemical stability

Chemical stability: Stable under normal conditions.

10.3. Possibility of hazardous reactions

Hazardous reactions: Hazardous reactions will not occur under normal transport or storage conditions.

10.4. Conditions to avoid

Conditions to avoid: Heat. Air.

10.5. Incompatible materials

Materials to avoid: Strong oxidising agents. Strong acids.

10.6. Hazardous decomposition products

Haz. decomp. products: In combustion emits toxic fumes of carbon dioxide / carbon monoxide. Nitrogen oxides

(NOx). Hydrogen fluoride (HF).

Section 11: Toxicological information

11.1. Information on toxicological effects

Relevant hazards for substance:

Hazard	Route	Basis
