Skin contact:	Remove all contaminated clothes and footwear immediately unless stuck to skin.			
	Drench the affected skin with running water for 10 minutes or longer if substance is still			
	on skin. Transfer to hospital if there are burns or symptoms of poisoning.			
Eye contact:	Bathe the eye with running water for 15 minutes. Transfer to hospital for specialist			
	examination.			
Ingestion:	Wash out mouth with water. Do not induce vomiting. Give 1 cup of water to drink every 10			
	minutes. If unconscious, check for breathing and apply artificial respiration if necessary.			
	If unconscious and breathing is OK, place in the recovery position. Transfer to hospital			
	as soon as possible.			
Inhalation:	Remove casualty from exposure ensuring one's own safety whilst doing so. If			
	unconscious and breathing is OK, place in the recovery position. If conscious, ensure			
	the casualty sits or lies down. If breathing becomes bubbly, have the casualty sit and			
	provide oxygen if available. Transfer to hospital as soon as possible.			
.2. Most important symptoms a	and effects, both acute and delayed			
Skin contact:	Blistering may occur. Progressive ulceration will occur if treatment is not immediate.			
Eye contact:	Corneal burns may occur. May cause permanent damage.			
Ingestion:	Corrosive burns may appear around the lips. Blood may be vomited. There may be			
	bleeding from the mouth or nose.			
Inhalation:	There may be shortness of breath with a burning sensation in the throat. Exposure may			
	cause coughing or wheezing.
