### Section 4: First aid measures

4.1. Description of first aid measures		
Skin contact:	Remove all contaminated clothes and footwear immediately unless stuck to skin.	
	Drench the affected skin with running water for 10 minutes or longer if substance is still	
	on skin. Transfer to hospital if there are burns or symptoms of poisoning.	
Eve contact:	Bathe the eye with running water for 15 minutes. Transfer to hospital for specialist	
_,	examination.	
Indestion:	Wash out mouth with water. Do not induce vomiting. If conscious, give half a litre of water	
ingestion.		
	to drink immediately. If unconscious, check for breathing and apply artificial respiration if	
	necessary. If unconscious and breathing is OK, place in the recovery position. Transfer	
	to hospital as soon as possible.	
Inhalation:	Remove casualty from exposure ensuring one's own safety whilst doing so. If	
	conscious, ensure the casualty sits or lies down. If unconscious and breathing is OK,	
	place in the recovery position. If unconscious, check for breathing and apply artificial	
	respiration if necessary. If breathing becomes bubbly, have the casualty sit and provide	
	oxygen if available. Transfer to hospital as soon as possible.	
4.2. Most important symptoms and effects, both acute and delayed		
Skin contact:	There may be redness or whiteness of the skin in the area of exposure. Irritation or pain	
	may occur at the site of contact. Absorption through the skin may be fatal.	
Eve control		
-	There may be severe pain. The eyes may water profusely.	
Ingestion:	There may be soreness and redness of the mouth and throat. There may be vomiting.	
	Convulsions may occur. There may be loss of consciousness.	
Inhalation:	There may be shortness of breath with a burning sensation in the throat. Absorption	
	through the lungs can occur causing symptoms similar to those of ingestion.	

Convulsions may occur. There may be loss of consciousness.

4.3. Indication of any immediate medical attention and special treatment needed
